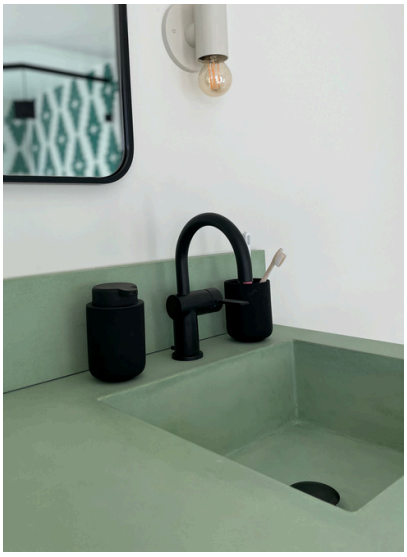
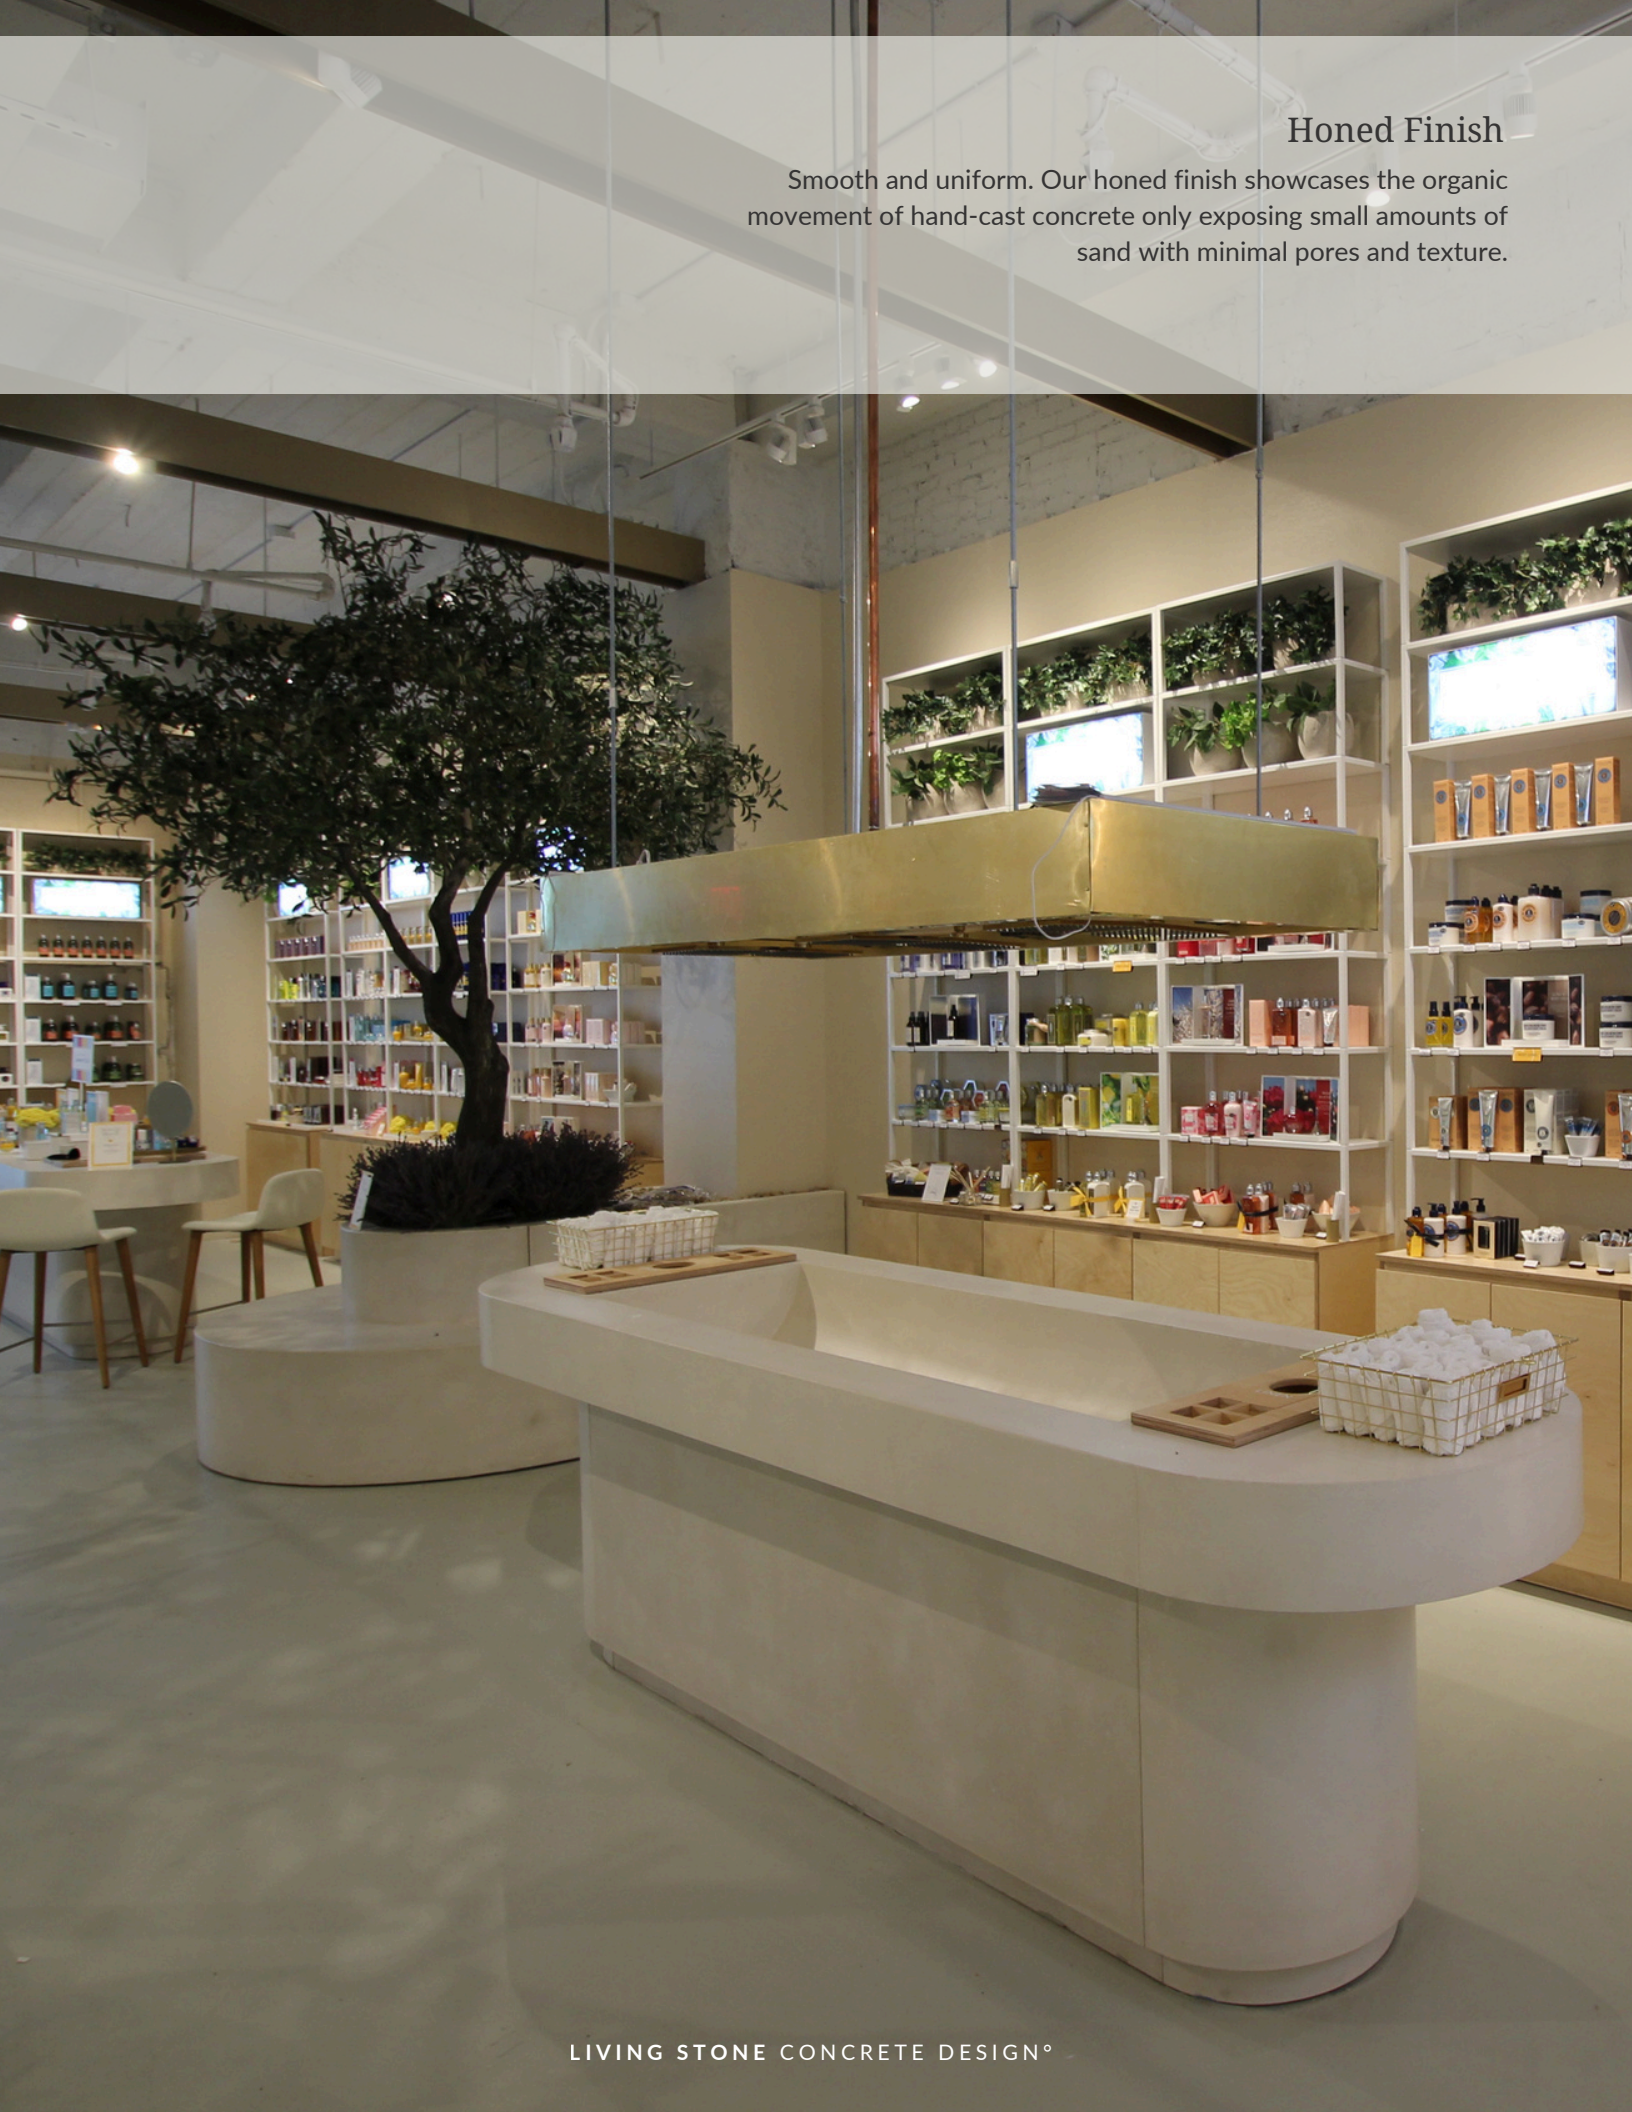
CUSTOM COLORS

If you're looking for maximum impact or head-turning objects and surfaces, concrete delivers. In terms of color options, concrete gives you the ultimate freedom and flexibility. Living Stone Concrete Design has extensive coloring-matching capabilities and can color-match nearly any Benjamin Moore swatch.

Please note custom colors add 20% more to the cost of the product and extend the lead time. Color matching sample fee $350.

CUSTOM COLOR PRODUCT INSPIRATION





Honed Finish

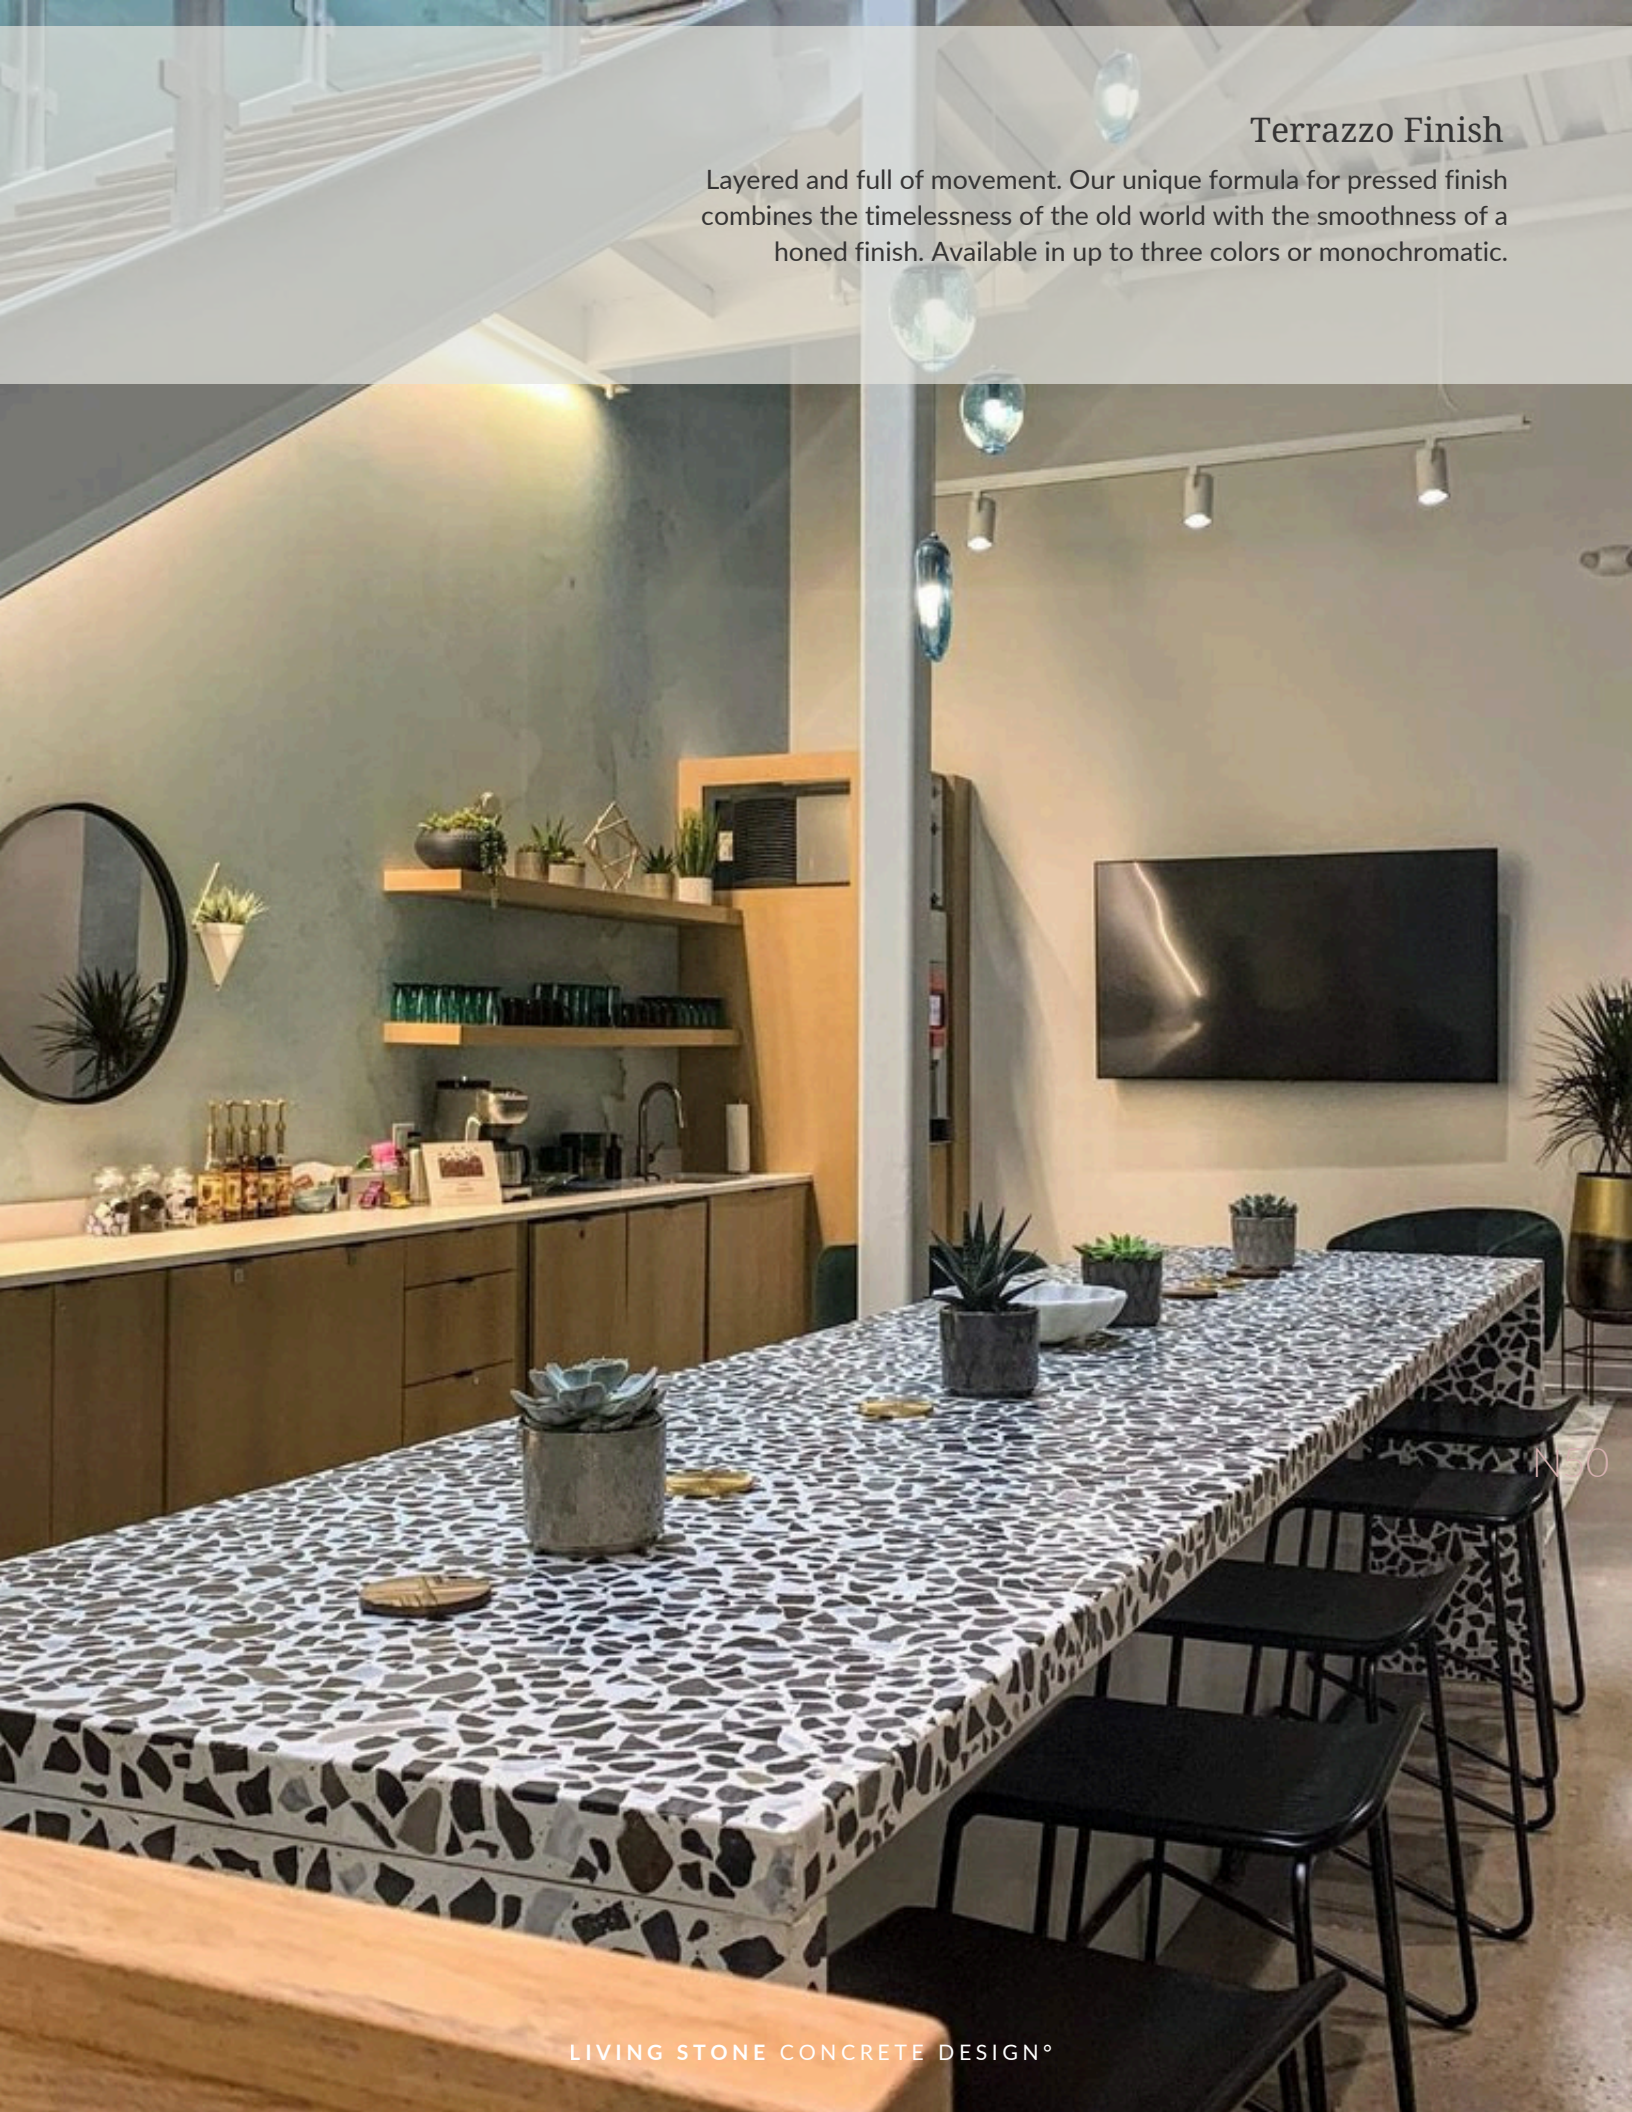
Smooth and uniform. Our honed finish showcases the organic movement of hand-cast concrete only exposing small amounts of sand with minimal pores and texture.

Old World Finish

Natural and organic. Old World finish appeals to those desiring a timeless, weathered, and unrefined aesthetic, evoking a sense of history and organic charm.

Pressed Finish

Layered and full of movement. Our unique formula for pressed finish combines the timelessness of the old world with the smoothness of a honed finish. Available in up to three colors or monochromatic.



Terrazzo Finish

Layered and full of movement. Our unique formula for pressed finish combines the timelessness of the old world with the smoothness of a honed finish. Available in up to three colors or monochromatic.

Acid-Stain Finish

Variated and distinctive. Acid stain is a chemical solution applied to concrete that reacts with the limestone to create variegated translucent color effects, enhancing its appearance with a unique artistic look.

Available in Three Colors

Board-Form Finish

The detail of natural wood patterns are directly formed on the concrete face, showcasing the grain, knots, and unique characteristics of the wood.

N50

Broken-Rock Edge

This profile finish gives a raw, unprocessed look that mimics a split-face rock detail to finished concrete.
