A dialogue of curve, texture, and architectural balance
Woven metal base framed in steel with stone top

The Entity Coffee Table completes the collection's sculptural narrative. Its base, composed of woven metal framed in steel, forms a curving structure that appears both strong and fluid—a tactile rhythm that catches light like woven fabric. Above, a refined top in stone seems to float, balanced with architectural precision over the open frame.

Every detail is deliberate: the interplay of metal and natural surface, the soft curvature that contrasts the table's linear strength, and the sense of suspension that connects it visually to the Entity Chaise and Console. The result is a piece that is both grounding and weightless—an elegant centerpiece where craftsmanship and calm coexist.
