

WCAA ANNUAL REPORT

COMMITMENT TO COMMUNITY | EXCELLENCE IN CARE

2025

2025 IN REVIEW

A YEAR OF SERVICE

In 2025, Warwick Community Ambulance Association recorded 5,001 dispatched incidents while continuing to invest in our providers, equipment, and community.

A replacement frontline ambulance, expanded respiratory care capabilities, and the launch of our EMS Training Institute marked important steps forward. We also secured approval for a prehospital sepsis pilot, establishing the foundation for an additional approach to care in the field.

Beyond emergency response, our team provided safety education, supported community events, and helped residents prepare to act when someone needs help.

These efforts reflect the dedication of our staff and the support of the people and organizations alongside us. Thank you for trusting Warwick and supporting another year of service.

@WARWICKEMS02

OUR PURPOSE

ROOTED IN COMMUNITY

Since 1956, Warwick Community Ambulance Association has served our community with a commitment to compassionate prehospital care. We support that work through provider education, community outreach, and continued investment in emergency response.

OUR VISION

To be a leader in innovative, compassionate, and responsive emergency medical services, supporting a healthier and safer community.

DELIVER EXCEPTIONAL CARE

Provide high-quality, patient-centered prehospital care through skilled professionals, evidence-based practices, and advanced technology.

STRENGTHEN COMMUNITY CONNECTIONS

Help residents feel prepared and supported through education, outreach, and a commitment to health and safety.

INVEST IN OUR TEAM

Support teamwork, continued learning, and professional growth to meet our community's evolving needs.

DEDICATION · COMPASSION · PROFESSIONALISM · INTEGRITY · TEAMWORK

2025 BY THE NUMBERS

Every dispatch begins with a request for help. In 2025, Warwick recorded an average of 13.7 dispatched incidents each day, responding within our primary service area and supporting neighboring communities through mutual aid.

5,001

The 4,238 figure excludes routine transfers, emergency transfers, and general EMS activity, as categorized in the original report. Dispatch totals do not represent the number of patients transported.

OUR RESPONSE ACROSS THE COMMUNITY

Warwick Township and Lititz Borough accounted for 3,324 dispatched incidents in 2025, representing 66.5% of annual dispatch volume. Our crews also supported surrounding communities through mutual aid.

General illness and falls were the most frequent dispatch categories, followed by breathing problems, unconscious persons, and chest pain.

132	Hemorrhage
132	Vehicle Accident

INVESTING IN OUR FLEET

In 2025, Warwick invested in vehicles and special operations resources that support emergency response, event coverage, and access to patients.

AMBULANCE 2

A 2025 Ford E450 with a remounted Braun Chief XL patient module replaced our 2009 Ford ambulance. The replacement includes a Stryker Power-LOAD system to assist with patient loading and unloading, along with updated exterior graphics.

SPECIAL OPERATIONS RESOURCES

Our John Deere Gator received additional warning lights, work lights, and equipment storage. Utility 1, a 2020 Ford F150, received an enclosed topper to carry additional supplies for firefighter rehabilitation and special events.

RESPONSE COMMUNICATIONS

VHF radios were added to paramedic response units to support communication during incidents on the Pennsylvania Turnpike.

BIKE TEAM

Our bike team provided medical coverage at Fourth of July fireworks, the Lititz Craft Show, the Farmers Market, and other community events, helping providers reach patients in crowded or difficult-to-access locations.

2025 MILESTONE

State approval secured for
Warwick's prehospital sepsis pilot.

ADVANCING PREHOSPITAL CARE

A FOUNDATION FOR EARLIER INTERVENTION.

At the end of 2025, Warwick received approval for a prehospital sepsis pilot following regional and state review.

Championed during its development by Zac Hartmann, the program was designed to allow trained paramedics to collect blood samples for hospital analysis and administer antibiotics to eligible patients under approved protocols and medical oversight.

The approval marked an important step in preparing Warwick to expand care before hospital arrival. The pilot is intended to provide data to the Pennsylvania Department of Health and Bureau of EMS to help evaluate this approach to prehospital treatment.

EQUIPPING OUR PROVIDERS

The tools our providers carry shape the care they can deliver. In 2025, Warwick expanded respiratory support capabilities, added a medication option, and continued refining equipment organization.

RESPIRATORY SUPPORT

VOCSN ventilators were added to frontline paramedic units, expanding the resources available for patients with complex breathing needs. The devices provide ventilatory support and BiPAP capability.

PAIN & FEVER MANAGEMENT

Intravenous acetaminophen was added to Warwick’s medication formulary, providing an additional non-opioid option for pain and fever management when clinically appropriate.

FIELD READINESS

Continued adjustments to our paramedic equipment setup focused on organization, ease of use, and portability, helping crews access the resources they need across different emergency settings.

RESPIRATORY SUPPORT • PAIN & FEVER MANAGEMENT • FIELD READINESS

EDUCATION THAT STRENGTHENS OUR COMMUNITY

DEVELOPING EMS PROVIDERS

In 2025, Warwick received a grant of nearly \$40,000 from the Lititz Community Regional Development Corporation to launch its EMS Training Institute.

Led by Scott Myers, the institute began with a focused Advanced EMT program for existing providers. An EMT course followed, establishing a foundation for additional educational opportunities and local pathways into EMS.

PREPARING OUR COMMUNITY

Warwick continued offering CPR and first aid instruction, Stop the Bleed programs, child passenger safety services, and public safety demonstrations.

Through partnerships with families, schools, and community organizations, these efforts helped residents develop practical skills and prepare to respond before professional help arrives.

LOOKING AHEAD

Plans for 2026 included expanded Advanced EMT, EMT, and Emergency Medical Responder offerings, alongside continued advanced life support and first aid education.

SUPPORTING OUR YOUNGEST PATIENTS

Colleen Bruckno

Pediatric Readiness & Community Outreach

Caring for children requires preparation, attention to detail, and an understanding of the reassurance families need during an emergency.

Colleen Bruckno supports Warwick's pediatric readiness through equipment preparation, weight-based medication resources, provider education, simulation training, and review of pediatric cases. Her work helps our team prepare for the distinct needs of younger patients.

She also oversees community education, including child passenger safety checks, CPR and first aid instruction, and Stop the Bleed programs. Working with families, schools, and community organizations, Colleen connects emergency preparedness with everyday safety.

As a mother of two, she brings a personal understanding of the trust caregivers place in emergency medical providers.

COMMUNITY MAKES THIS WORK POSSIBLE

Our work is supported by people who care about the health and safety of their neighbors. Thank you to the residents, supporters, community organizations, and partners who contributed to Warwick's service in 2025. Your support helped make investments in equipment, education, and emergency preparedness possible.

We recognize the Lititz AMBUCS for their longstanding support and the Lititz Community Regional Development Corporation for its investment in EMS education. To our staff, thank you for the skill, compassion, and dedication you bring to every response, classroom, and community event.
