Projector Q & A's

What projector do you have?

Epson EB-2065.

Where is the projector?

In the Workshop near the centre of the room, it projects onto the left-hand wall onto a pull-down screen.

Where can I plug into the projector?

From directly below the projector or from the left-handed corner of the workshop via a HDMI receiver.

What device do I need?

Any laptop or computer that has an HDMI port (we also have alternative adaptors for USBC ports).

Can we play sound?

You can play sound directly from the projector; however, the sound can be very tinny. We recommend connecting to our HDMI receiver and then connecting to our sound system via Bluetooth.

Do we need the lights off for it to work?

No, our projector does not require darkness to project images or videos.

Do you have clickers or other gadgets?

No, if you plan a presentation and require a clicker you must supply your own. This is the same for any other gadgets you may require.

Can I move the projector?

No, the projector is fixed to its bracket so must not be tampered with.
