Sculptural meditation in metal and stone

A sculptural meditation in form and finish, the Breathe Table captures the essence of stillness through movement. Its organically shaped base is carved of wood and finished using a multi-step pigmented process. The result is a luminous, refined surface with depth and subtle reflection, offered in two custom finishes: Light Gazelle and Silver Storm.

Above, an elegant oval top is cut from our three natural stone selections, its natural movement and tonal variation echoing the fluidity of the base below. The contrast between the precision of the finish and the organic character of the stone creates a quiet tension—solid yet fluid, grounded yetweightless.

The Breathe Table is both object and experience: a moment of pause rendered in material. Designed as a sculptural centerpiece, it invites reflection through proportion, surface, and the quiet choreography of form.
