

prAna®

spring - summer swim
2026

Hi, we're prAna,

a California lifestyle brand that celebrates the spirit of adventure and discovery, empowering individuals to embrace an active lifestyle and pursue their passions with confidence and enthusiasm.

We design apparel that blends style & versatility for individuals who embrace movement and have a deep reverence for nature.

Spring 2026

Natural Power, is the harmonic convergence of energy. The symbiotic relationship between water and land, people & food, power & purpose. We found inspiration while volunteering, exploring and learning from our island host. Taking reference from the lush, tropical sustainable farm in Hawaii, where we volunteered, we brought this infinite energy to our seasonal collection by reflecting the purpose of circularity-taking with us while giving back and offering forward.

This season we celebrate the beauty of simplicity and power of connection through nature inspired prints, natural touch fabrics, and hand crafted details. Our color palette takes inspiration from the flora & fauna of Kauai, with neutrals mimicking sand, stone, and sea balanced with the optimistic brights of warm fruity mango, guava, berry adding a breathe of energy, positivity and sense of sunshine into this Spring 2026 collection.

HOW TO MEASURE GUIDE:

BUST/CHEST- Place the tape measure under the arms and around the fullest part of the bust, with arms relaxed down at sides.

BRA-SIZED SWIM TOPS-

Find your **BAND SIZE** by placing the tape measure firmly around your rib cage, just below your bustline. Take this measurement and add 5” to the measurement, if the measurement is an odd number, round down to the next number.

Find your **BUST SIZE** by placing the tape measure slightly looser than the band size measurement and wrap around your back, across the fullest part of your bust. Round up if you don’t get a whole number.

Your **CUP SIZE** will be the same as you wear in lingerie.

WAIST- Measure approximately 2” below the natural waistline or 2 fingers below the navel. This measurement applies to our swim bottoms, board shorts and swim tights.

HIPS- Standing with your feet together, measure around the full-est part of your hips.

INSEAM- Measure from your crotch to the ground, keeping tape measure straight.

TANKINI FIT GUIDE:

FITTED- Form fitting to body

STANDARD- Skims the body with slight contour

CROPPED- 16”-22” from HPS to hem

MID-LENGTH- 23” from HPS to hem

STANDARD LENGTH- 24” from HPS to hem

Brand new addition

Marketing Style List: Trend Right, volume driving styles that support brand initiatives.

Organic: Fibers which meet regulations by the USDA National Organic program, ensuring highest environmental agricultural practices.

Hemp: Naturally bacteria-resistant and quick-drying, hemp can survive on rainwater, reduces the need for pesticides, replenishes the soil, and produces more fiber per acre than trees or cotton.

Recycled: Reduce our impact on the planet. Reuse existing materials. Recycled again and again to create circular materials.

Stretch: Stretch fabrication extends, expands and contracts to move with you allowing for ultimate flexibility during any sport, activity or movement.

UPF (Ultraviolet Protection Factor): The protection given to the skin by a fabric is indicated by its UPF. Specifically designed to block the sun's harmful UV radiation from damaging the skin (widely known as UVA/UVB/UVC rays).

TENCEL™ Modal: From sustainably managed beechwood to a deliciously soft sensation, TENCEL™ Modal fibers are a lightweight luxury for you and the planet.

TENCEL™ Lyocell: Derived from controlled sources of renewable wood, beautifully breathable TENCEL™ Lyocell fibers are made in a closed-loop process, creating almost zero environmental impact.

Tencel™ Lyocell fibers with REFIBRA™ Technology: The pioneering REFIBRA™ technology involves upcycling cotton scraps from garments into cotton pulp. This is mixed at a 1-3 ratio to wood pulp and the combined raw material is transformed to produce new virgin TENCEL™ Lyocell fibers.

Quick Dry: Water resistant, these products keep moisture on the fabric's surface making it easy for the sun and/or air to lift moisture out and promote evaporation.

Moisture Wicking: Moisture management fabrics wick perspiration moisture from the inside out.

PFAS-free durable water repellent coating allows us to create outdoor-ready clothing without the need for per- and poly-fluorinated chemicals.

Up to 2,000 chemicals are used to make clothing. With 3rd party bluesign® certification, working at every step of the textile manufacturing process to assess and approve chemicals and processes that are safe for our environment, the workers, and the end user.

Fair Trade Certified™ Factory: For each product we order from these factories, we pay an additional premium back to the workers who made them, where they'll vote on how to spend the funds to improve their communities.

Fair Trade Certified™: When you choose Fair Trade Certified™ products, you're voting with your dollars to support responsible companies that put their factory workers, farmers, and the environment first.

Regenerative Organic Certified® — an umbrella certification covering environmental protection, animal welfare, and fair trade — represents the highest standard for organic agriculture in the world. By purchasing Regenerative Organic Certified® products, individuals can connect with a full suite of important values and know at-a-glance that their purchase makes a positive impact at every level: environmentally, ethically, and socially.
