# THE HOUSE COLLECTION

## WHO WE ARE?

We transform tents, venues, and open-air spaces into immersive environments through draping, lighting, and curated installations. From intimate garden dinners to large-scale tented celebrations, every design is tailored to feel intentional, elevated, and uniquely yours.

We don't simply decorate spaces.

We shape experiences...

## WHAT WE DO?

From design to execution, we do it all. After an initial consultation, we'll put together a design layout for you and we'll add graphics and photographs to our proposals so you have a better understanding of where our design elements will be installed within a space. All of our design products are impeccable and of the highest quality.

All of our lighting designs are dimmer-controlled and on your wedding day, we take care of installation and breakdown.

# RECEPTION INSTALLATIONS

One of the most impactful tent enhancements, ceiling draping softens the structure and creates an elevated atmosphere. Flowing fabric adds visual interest overhead while enhancing lighting, chandeliers, and floral installations.

# CEILING DRAPING

HAND DRAPED SWAG/PANEL

# OUR SIGNATURE CEILING INSTALLATION

A modern take on traditional tent draping, this installation creates dramatic movement, visual depth, a weightless feel and a striking focal point overhead.

## HANGING CLOUD CEILING

Available in different sizes and colors

Designed to soften tent architecture while maintaining open views and natural light.

# SIDE POLE DRAPING

Custom fabric colors available

The difference between a tent and an experience. Perimeter draping softens structural lines, adds depth and movement, and creates the feeling of stepping into a thoughtfully designed space. The result is a tent that feels warmer, more elevated, and effortlessly beautiful from every angle.

# PERIMETER DRAPING

Custom fabric colors available

Often considered the finishing touch of a beautifully draped tent, valance draping creates a polished look by concealing tent hardware and draping attachment points.

**Customization:** Scallop-shaped or different trim colors available.

# VALANCE DRAPING

2 PANELS

Designed to frame the moment guests arrive, entrance draping transforms tent openings into a statement moment. Soft fabric, layered details, and thoughtful styling instantly elevate the space and set the tone for everything that follows.

# ENTRANCE DRAPING

1 PANEL

Tent poles are one of the most visible structural elements inside a tent. Center pole draping conceals these exposed supports with fabric, creating a softer and more polished appearance. This treatment pairs naturally with chandeliers, ceiling and side pole draping to create a cohesive design throughout the tent.
