# MEET YOUR STORYTELLER

I specialize in Lifestyle Wedding photography. The reason why I specialize in lifestyle photography is because I love capturing more of the fun, raw moments.

Sometimes pictures can make you look too unnatural which doesn't capture the true you. Does your dad make you laugh all the time? Capture a real father daughter moment!

Lifestyle photography is a mixture between posing and candid moments. I like capturing natural posed portraits and the candid raw moments you don't expect.

I feel my style is different from other photographers because of the balance I have in my work. I believe you should enjoy your day and allow me to capture those real and raw moments but at the time same have those creative and beautiful portraits to hang on your wall.

# THE EXPERIENCE

*Capturing Emotions, Not Poses*

I believe a wedding is more than a single day — it is a fully immersive experience where design, atmosphere, and guest experience come together in unforgettable ways.

My approach blends documentary storytelling with the energy of extraordinary celebrations, capturing both the grandeur of dramatic build-outs and statement florals, as well as the intimacy of vows and quiet, meaningful moments.

Each celebration is viewed as art in photos. From editorial-style portraits that feel pulled from the pages of a magazine to the bold electricity of the dance floor, every photo is crafted to feel layered, intentional, and alive. The result is a photographed heirloom — a timeless piece that reflects the scale, artistry, and emotion of a once-in-a-lifetime celebration.

# KIND WORDS

We first had kayla for our wedding photographer and she was absolutely amazing!! She was so kind, easy going, and was able to capture the most special moments of me and my husband and family that i will cherish forever! After our amazing experience with our wedding we booked her for maternity photos, she was so adaptable to our changing plans with weather, and location, and made me feel so comfortable and beautiful when I was SO pregnant. So naturally we booked with her for a mommy and me session which was so fun and easy and turned out amazing as well. I now wouldn't choose any other photographer!! She's the best
