

Liberal Votes by Bill Coleman

For eight years in the Senate, Bill Coleman has voted in ways that don't reflect our values. This paper shows just a few examples. Coleman's voting record has drifted far from conservative principle. In 2025, a group of grassroots conservatives led by the vice chair of the Oklahoma Republican Party graded every vote Coleman cast on approved legislation and found that Coleman voted according to the principles of the Republican Party just 36% of the time. That score can be seen in full at OKGrassroots.com.

And now he wants a last term — as a lame duck, with no re-election, no consequences, and no pressure to respect the values of the people he represents. When politicians know voters can't stop them anymore, their votes get even worse.

We can't afford to hand over the next four years to a senator who has already shown us who he really is.

SB 1591 **Giving the Illegal Alien Invaders an Official Oklahoma ID**

Not just once, but twice, Bill Coleman voted to **grant Oklahoma driver's licenses to illegal immigrants** — a plan pushed by a liberal immigration lawyer from south Oklahoma City. That vote would reward illegal border-crossers with official state identification, with all of its implications such as potentially giving drug cartels and human-smugglers easier access to banking and financial systems. Instead of protecting our borders, Coleman helped advance the agenda of those who violate our laws. *SB1591 (2022)*

SB 1620 **Coleman Authored a Dangerous Expansion of the Surveillance State**

Bill Coleman didn't just vote for license-plate scanners — **he wrote the bill** that would unleash Orwellian mass-tracking technology across Oklahoma. These systems are handed out through questionable, sole-source contracts, come with known cyber-security risks, and are ripe for abuse. Even worse, their unconstitutional deployment could lead to overturned convictions, harming public safety and re-victimizing Oklahoma crime victims. And while law-abiding citizens get monitored in real time, these systems often **exempt immigration enforcement**, letting those who crossed our border illegally avoid accountability while tracking citizens who are playing by the rules. Fortunately, only 13 Senators voted for Coleman's bill and it was defeated by a large margin. *SB1620 (2024)*

SB 670 **Coleman Voted to Mandate Government-Designed Mental-Health Screenings on Every Oklahoman**

SB 670 forces doctors and nurses to administer a state-approved psychological test to every patient — including your children — just to see a primary-care provider. If a provider refuses, they can be punished. This law empowers unelected medical boards to define mental health ideology for the entire state and gather private data on every Oklahoman who seeks care. *SB670 (2025)*

SB 623 **Silencing Christian Counselors From Giving Biblical Counsel**

Coleman voted for SB 623. It was sponsored by a liberal Democrat from Tulsa and would align Oklahoma social-worker licensing standards with national woke activist groups. If a Christian social worker — including those serving in our schools — refused to embrace progressive “gender-affirming” ideology or provided counseling consistent with biblical teaching on sexuality, these liberal organizations could brand them “unethical” and the state could censure them or even yank their license to practice, basically putting them out of a job. Fortunately, though Coleman and the Senate passed the bill, the House didn’t approve it, but it was too close of a call for comfort. This was something that one would expect in Soviet Russia, not the United States of America. *SB623 (2019)*

HB 2147 **Allowing City Government to Foreclose on Private Property**

Coleman supported dismantling long-standing safeguards that once prevented city governments from overreaching. With his vote, cities can now move to foreclose on and take private property, using code enforcement as a weapon — allowing aggressive code enforcement to become a pretext for government seizure of private land. *HB 2147 (2025)*

HB 1712 **Coleman’s Toll on Your Freedom**

Coleman backed the “Road User Charge Pilot,” a plan designed to pave the way for tolling virtually every mile Oklahomans drive — using intrusive tracking technology to monitor your driving actions and charge you for them. The state poured millions into this experimental program, a level of waste that is almost as shocking as the idea behind it. And it didn’t end there: when the pilot wrapped up, the program’s publicly promoted website — the very link citizens were instructed to use to interact with state officials — fell into the hands of domain squatters tied to offshore gambling interests, exposing participants to needless privacy and security threats. *HB1712 (2021)*

SB 511 **Coleman Voted to Enable Illegal Drug Use**

When Bill Coleman voted to for a state authorized program that distributes free drug paraphernalia for recreational use, he sent a dangerous message: illegal drug use is acceptable — and the government will help you do it. Rather than insisting on recovery, accountability, or treatment, Coleman supported giving users the tools to stay trapped in addiction. His choice helped push deadly drug culture deeper into our communities. *SB511 (2021)*

HB 2365 **Coleman Authored the DEI in State Purchasing Bill**

At the peak of the woke era, Coleman joined the woke mob and authored a DEI preference bill requiring state purchasing officials to categorize state vendors based on their DEI hierarchy. Taxpayer dollars should be spent according to the best deal for the taxpayer, never Bill Coleman’s DEI preferences. *SB511 (2021)*
