

# Size Guide

Because each pair of handmade She's Fun shoes is made to order just for you, returns/exchanges are not accepted.

She's Fun shoes are sized in European sizes. Please do not rely on a simple US-to-European size conversion chart alone. We created these actual-size sole outlines to help you compare the available sizes and feel confident that you're selecting the best size for you.

The needlepoint-ready slides do not fit particularly wide or narrow and it is normal for your foot to slightly spill over the sides width-wise when standing on these printouts. What you're really concentrating on is finding your correct length. Please select whichever sole size fits best from the toe to heel.

## *Before you print...*

For sole outlines to be accurate, they must print at actual size:

1. Print on US Letter (8.5 × 11") paper only
2. Do NOT select "Fit to Page" or "Scale to Fit." This will result in the outline being totally inaccurate.
3. Select "Actual Size" or "100% Scale" in print settings
4. Measure the 1" ruler on the printout with a ruler of your own. It should be exactly 1 inch. If it is, you're ready to go!

## HOW TO RULE OUT BEING BETWEEN SIZES

*When you place your foot on the outline...*

*Do Not*

Place your heel down \*first and then simply see which length is most roomie.

This will not have your foot lined up correctly and might cause ordering too large of a size (which will be more difficult to walk in).

*Do*

Place the bunion area of your foot right on top of the bunion area of the outline \*first.

This will most accurately line up your foot with how it will sit when nestled inside the strap and show you how much space you do/do not have behind your heel.

(Note: I am a true US 8.5)
