An emblem of transformation, rendered in material and form

The Cicada Coffee Table is an artful fusion of material contrast and symbolic meaning. Its top is offered in reclaimed wood—finished in either a bleached or aged tone—celebrating the passage of time and the beauty of renewal. The table is also available with a slab of Titanium Gold granite, finished with softly eased edges, offering a refined counterpoint to the organic language of the base.

At either end of the table, a cast cicada motif emerges as both ornament and structure, embedded within a textured frame that forms the legs of the piece. Long revered as a symbol of transformation and rebirth, the cicada lends the table its narrative depth—anchoring the design while inviting closer inspection through layered texture and sculptural detail.

Balancing artistry with function, the Cicada Coffee Table is designed as a conversation piece—grounded yet expressive, and equally at home in residential or gallery-like interiors. It is a quiet but powerful statement, exploring renewal, craftsmanship, and the enduring dialogue between nature and design.
